# How Does The Shibboleth Consortium Spend Its Money

Planned Work

Planned work is stuff we would love to do, if only we had the resource. Increased funding from members would help us move these things from the planned list, to the committed list.

The most common request we receive is to improve documentation. your support can help us prioritise this demand

$ It's Not All About The { Code; }

45% of our development time is spent on user support, standards development and project management. **It's not all about the code.**

Our Promise to Committed Work!

The priority for the Shibboleth team is our Committed Work. These are the outputs we have promised to complete for the community within the next 12 months.

Signed Shibboleth

Our Wish List

There is a long list of things that we know you'd like to see implemented, but that we cannot even start to think about assessing for the roadmap.

More membership funding can help us turn some of these wishes in to features.

90%

Over 90% of our budget is spent directly on developer time . Our work is prioritised by community consultation and user input via our mailing lists.

Anyone can have a say in helping shape the shibboleth roadmap.
